

Dunshaughlin Community School Extension

The project involved the construction of a new extension and the refurbishment of the existing school.

A number of temporary classrooms had to be constructed prior to construction in order to provide a Science Lab, a woodwork room, a technical graphics room and some general classrooms. The new extension is a two storey building linked to the existing school building. There is 24 general classrooms, 3 science labs, a word processing room, design & graphics, a multi-media lab, a staff room and associated offices.
