

Callis Yard, Woolwich

Callis Yard was a new build development of 152 apartments consisting of 117 private dwellings, 14 shared ownership dwellings and 18 rented apartments, as well as the conversion of a heritage listed stable block into three townhouses.

The development featured a child play area, business centre and private gym for the residents. The project included a mainly green roof area across the 5 blocks of building, with the plant rooms, bin and bicycle store located in the basement.

The bright and light residential apartments and the old stables conversion create a vibrant, new and contemporary community in the capital.
