

IDA Advance Technology Building, Galway

Parkmore Business & Technology Park is occupied by many highend manufacturing and international services clients and our most recent project for the IDA is in response to the growth and demand in this area of Galway.

The project consists of the construction and completion of the Technology Building, which includes reinforced concrete foundations and ground floor slab, blockwork and RC rising walls and M&E installations.

This new facility offers 3,150m² of Grade A office accommodation and open production space and benefits from a full height glazing system to optimise natural light. The building is fitted out to include raised access floors, suspended ceilings, lighting, heating, air conditioning, reception, finished toilets, showers and common areas. The building achieves a high BER rating of A1 and is LEED Accredited.
