Davis Langdon PKS

Duration:
March 2004 - September 2005

Contract Value:
£5.1M

Tuam Leisure Centre

Description

This project was a 'pavilion' style building with substantial glazed elements. The building consists of a double height pool hall with a lightweight curved steel roof structure over that is anchored by a more conventional design two-storey element adjacent, that holds the dry leisure element. The main pool is 25 meters x 6 swimming pool, with separate learner and children pools. The complex is complete with uni-sex changing area, group changing areas, gym, sauna, steam room, spa area and aerobics studio.

The building is a combination of steelwork and concrete frame with metal clad walls and roof and rendered blockwork walls including all associated mechanical, electrical services, lift, filtration system and associated external works, including car parking space for car/bus.
