

Sustainability in Action: NUIG Life Course Studies Building

JJ Rhatigan and Company recognises, in addition to the environmental and social benefits, the business benefits of operating with sustainability in mind. We work collaboratively with design teams and clients to ensure that our developments are self-sustainable and eco-friendly where possible.

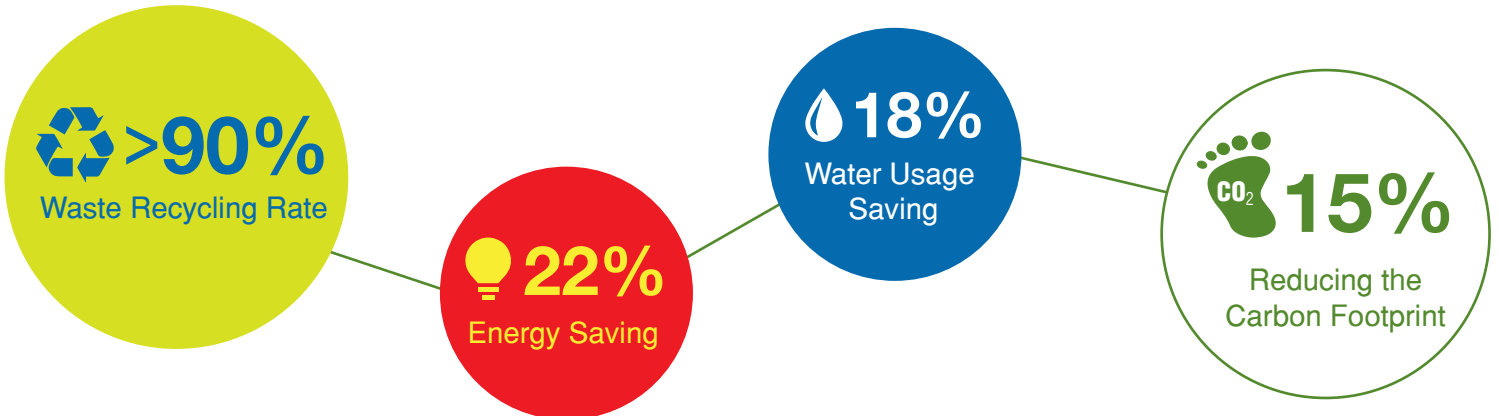

In recognition of this, JJ Rhatigan & Company has once again been awarded 'Sustainable Project of the Year 2015' for the NUIG Life Course Studies Building. Below are some highlights of sustainability in action on the project.

6 WEEKS
