

NUI, Maynooth Student Accommodation

The project comprised of the construction of a new student accommodation in three courtyard blocks, four to nine stories in height with a total gross floor area of 9,300m².

Works included a new stand-alone energy centre, refuse collection point, associated site works and pitch enabling works. The building site was confined and occurred in a live university campus close to other student residences to the east and mature residential dwellings beyond the northern boundary of the site.
