

Maynooth University (TSI) Building

This landmark infrastructural development, is designed to enhance the University's excellence in research, education and skills development for future generations. The new TSI building forms an entirely new building edge to the campus creating a striking four storey block and a roofline that ascends boldly, signaling the approach to the campus and to the town.

This high-tech hub provides 10,554m² of teaching, learning and academic workplace including: living labs and break out rooms for interactive research; three large theatres of 500, 300 and 250-seat capacity, and research spaces for students, academics and collaboration with industry partners. It also includes a spacious outdoor plaza, artfully designed for gatherings, cultural activities, events and creative performances.
